It is no the first time that Manila has benefited to a very marked extent by the disturbed state of the mother country. The great voyager La Perouse in describing hi visit to the Philippines diew a forcible picture of the evil effects which resulted Instant will not be forwarded unless from the jealous policy of Spain wherehe the Late Fee as well as the postage is "the productions of India and China were at least as dear as in Europe" Ships from China, were even prohibite from entering the port, while no Chine was allowed to settle in the country Even the trade between the Philippine and Mexico and South America was if no better condition, a single ship being its only medium of transport. The way of 1835 however, unhappily as it desolated the home provinces, resulted in the aboli tion of this absurd system of restriction which seemed to have been copied from the Chinese, and from that time to the present the grievances complained of have related only to the exorbitant and prohibitive rates of tariff. It, is possible that some of our readers who have heard of differential duties "scarcely understood the precise meaning of the words; they im

nly "a different oustoms tariff for vessel whose nationality is other than Spanish Thus Spanish commodities imported in Spanish bottoms paid three, and foreign commodities seven, per cent, ad valorem The same goods imported in a foreign vessel paid respectively eight and four teen per cent; and so with all other articles specified in the tariff, though the difference of rate was not always uniform. The natural results of this was certainly to force the greater part of the import trade into Spanish vessels, but from the monopoly thus gained and the resulting beence of competition articles maintained prices which were fer too high to permit trade to flourish. Hence the importance-of-the-Decree which has just been issued ... This reduces by 50 per cent all the charges mentioned in the tariff over 3 to 8 ber cent, the average scale of duty , and by 50 per cent the differential duty on foreign flags, which is to be kep up for the space of two years, to counted from the time this decree endorsed by the "cumplese," both charges being suppressed at the end of that term. In the new tariff, the export due on all articles charged therewith, sie suppressed; the exporters, nevertheless, being still compelled to declare the goods which they export, their quality and quantity, and it being the duty of the Customa Administrations to supervie and make note thereof in order to frage the commercial statistics of the Archi pelago. The tax of 2 per cent upon European goods imported in Spanish ships proceeding from the ports of the

likewise suppressed. It cannot of course be expected that he result of this liberal movement will be seen at the moment. But it may be hoped by the least sanguing that initwo years hence the trade between Hong to and Manila will be on a totally different footing. The beneficial changes each lished extend beyond the articles of trade and commerce to the ships which carry them. Indeed we believe that the unpopularity of the Philippines trading country with British owners and shipmasters, proce as much from the vexations and troublecome transtions, which made the captains one long course of anxiety and annot ance, as from the tarriff itself. The past of the changes, in question is briefly the establishment of a "discharge tax in which is merged all the former ince collected nuder the heading of Light cleansing anchorage, shipment, die charge and other taxes.
